Eastern Star Install Officers.

The annual installation of officers of St. Hilda Chapter O.E.S. took place in the Masonic Hall, Tuesday evening, Jan. 21st.

A number of visitors and friends were present to witness the installation, which was conducted by Mrs. J. W. Phillipson and Mrs. A. Boyce.

The officers installed were as follows:

W. M., Mrs. Evans
W. P., Jas. McDougall
A. M., Mrs. Adehead
A. P., David Hughes
Sec. Mrs. D. A. Edwards
Treas., Mrs. S. Tighe
Com., Mrs. Morgan
A. C., Mrs. Hughes
Adm., Mr. A. Boyce
Ruth, Vera Sexsmith
Eather, Mrs. Booman
Martha, Maurine Saugstead
Electra, Mrs. Barrett
Warder, Mrs. Wrightson
Sentinel, Harry Pearson
Chaplain, Mrs. Sexsmith
Marshall, Mrs. Shiels
Organist, Mrs. Hillyard

Following the installation, Mrs. Lowrie, worthy matron for the past year, was presented with her past matron's jewel. Presentations were also made to Mrs. Phillipson and Mrs. Boyce. All of whom responded in a pleasing manner.

Lunch was then served, which was followed by solos by Miss Saugstead and Mr. Tonjum and a violin solo by Mrs. Adehead.

Didsbury Overwhelms Innisfail, 7-2

Didsbury hockey sextette won their first game of the season when they tangled with the Innisfail team on Monday evening on the local rink before a very small crowd.

Johnson, a new addition to the local team scored, the first goal. Lyl Hall soon evened the count. Cook made a solo rush in the last minute of the period to put the locals one ahead.

In the second period only one goal was scored and the credit goes to Robinson of Didsbury.

In the third period Didsbury team went on a scoring bee and scored four goals, Robinson and Johnson each securing one and Cook two. Thompson, of Innisfail, scored one. Final score, 7-2.

Didsbury: W. McCoy, C. Studer, Cook, Crossweller, Huget, Robinson, Johnson, Gelger, Moyle.

Delegates Attend U. F. A. Convention.

The several U. F. A. locals of district all sent delegates the U. F. A. convention which is being held in Calgary this week.

The following were the delegates who attended: Mr. Hugh McLean, Burnside; Mr. J. Topley, East Didsbury; Messrs. Abe Snyder and Ernest Clarke from the Didsbury local.

There were a number of visitors to the convention, amongst whom were Mr. N. S. Clarke, Mr. and Mrs. Charles Harpold, Mr. and Mrs. Charles Long, Mr. and Mrs. W. J. Scheidt and Mr. Dave Irwin.

U.F.A. Convention at Calgary.

United farmers and farm women representing rural locals in all sections of the province, met in Calgary for the opening of the 22nd annual convention of the U. F. A., on Tuesday.

About 400 members were enrolled at the open and this was largely increased during the day.

Mayor Andy Davidson welcomed the convention to the city and the delegates were greeted by His Honor, Lieutenant-Governor Wm. Egbert and Premier Brownlee.

Premier Brownlee expressed his pleasure in meeting the people with whom he had worked for the past several years. He urged that Alberta citizens face the future with courage and confidence, in spite of the hardships reflecting a reduced crop in parts of the province, and in spite of the fact that unemployment relief is costing the government between two and three thousand dollars daily.

Following the delivery of the addresses of the president, H. W. Woods, and Mrs. Warr, president of the U. F. W. A., the reports of the directors was presented.

This showed a total membership for the past year of 13,188 as compared with 12,323 in 1928, an increase of 865 members.

On Tuesday afternoon the financial statement was presented and a number of constitutional amendments were considered.

The main feature in the evening was an address on "Constructive Co-operation" by A. Simmonds, of the Saskatchewan Co-operative Wholesale Association.

"Pioneer" Want Ads bring results.

Knox United Church Anniversary

First Anniversary Services will be held Sunday Jan. 26th at 7.30 p.m. Special preacher Rev. J. Rex Brown, of Calgary, who recently opened the splendid North Hill United Church in that City.

This Sunday every person is asked to be present. It is an occasion for thanksgiving and rejoicing and an event of real significance in your midst.

The choir is making preparations in the way of appropriate music.

On Wednesday evening, Jan. 29th, an evening of entertainment will be held. The Georgian singers and players will hold forth.

Rebekahs Hold Bridge Many Hear King and Whist Drive. George Speak.

The Rebekah Lodge held a bridge and whist drive in the Oddfellow's Hall on Wednesday evening. There were sixteen tables and the players seemed to have a very enjoyable time. Lunch was served and informal dancing was afterward indulged in.

The prize winners were: Bridge, 1st, Mrs. Ranton and Mr. Fleury; consolation, Miss Farrell and Mr. W. G. Leisemer. Whist, 1st, Mrs. Phillipson and Mr. W. Klein; consolation, Mrs. Marcellus and Mr. J. E. Gooder.

Boys and Girls Fund Campaign Opens.

Mr. J. Boorman was in Calgary on Monday attending a conference of boys and girls work leaders. The promotion of the campaign for finances to carry on the boys, girls and childrens work in the province was the topic of discussion. The campaign begins on Feb. 1st.

On that date, Feb. 1st, the C. G. I. T., Tuxis and Trail Rangers will hold their annual mother and daughters and father and sons supper and social.

On Sunday Feb. 2nd, it is planned to a mother and daughter, father and son service in the United Church. More particulars will be given next week.

It has been said that a dollar spent for lunch will last five hours, a dollar spent for a necktie lasts five weeks, a dollar invested in an automobile may last five years, but one dollar spent on boys and girls work last for eternity.

NOTICE.

The Alberta Co-operative Live Stock Producer's Association wish to notify all old contract signers of the Livestock Pool that they have the privilege of shipping their livestock through this association and also all farmers wishing to co-operate with the pool have the same privilege until further notice.

The shipper engaged is Mr. Bob Simpson, who will be at your service at all times. Phone 41. Committee.

Mr. Claypool reports the South Alberta Co-operatives have signed the cross contract with the A.C.L.P. The Southern Co-op has a membership of 1800 and covers a radius of 60 miles from Lethbridge.

Local Man Director Of Alberta Fairs.

V. E. Foster, of Camrose, was re-elected president of the Alberta Agricultural Fairs Association at the second and final day's session of the 25th annual convention of that body, which was held at Edmonton.

The other officers elected were Honorary presidents, Hon. George Hoadley and H. A. Craig; vice-president, John Wilson, Innisfail; directors, northern portion of the province, H. Huxley, Lloydminster, R. Stewart, Lamont; southern portion, Mrs. Mellis, Rimbey, and J. V. Berscht, Didsbury.

President Forster, in taking office for the third year in succession, thanked the delegates for the honor accorded him and declared that the present convention had been the best one he had ever attended.

The 1931 convention will be held at Calgary.

Visit Crossfield For Installation.

A number of the Didsbury Oddfellows went to Crossfield on Wednesday night to take part in a joint installation of officers which was held in the Crossfield Oddfellows' Hall.

The officers of the Crossfield and Didsbury Oddfellows Lodges were installed by District Deputy Grand Master Anderson and his staff from Calgary.

The following officers of the Didsbury Lodge were installed.

N. G., Ellis Barnes
V. G., Eddie Ford
Sec. James Halton
Treas. Ivan Weber
Com., Ward Kieth
Warden, Noble Cole
I. G., George Smith
L. S. V. G., Nile Hunsperger
L. S. S., Cliffe Trennum
Chaplain, Frank Freitz
P. G., A. V. Buckler.

No Speed Limit.

In abolishing all fixed speed limits for motor cars, with the exception of school districts, Edmonton is taking a step that brings it more closely in line with the provincial Motor Vehicles Act. No doubt there has been a feeling that the city by-law would be declared ultra vires of the provincial act in the case of a real test, and as much has been claimed in the case of both Edmonton and Calgary in interviews given by the counsel for the Alberta Motor Association.

Edmonton starts on fresh and safe ground, it appears, when it says that motor cars shall not travel at an immoderate rate of speed. The variance between the city and provincial regulations is therefore harmonized and motorists know just what is required.—Good Roads

L. J. W. Phillipson has auction sales for J. Devolin on Jan. 30th, and Walter Swingle on Feb. 25th.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips' Milk of Magnesia neutralizes instantly many

times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Please let it show you—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Reduce Armies As Well As Navies

The outstanding event of this opening month of the new year is the assembling of the naval reduction conference in London, England, upon invitation of the British Government to the other Great Powers, to devise ways and means of securing a substantial lessening of the burden borne by all in maintaining huge navies, while at the same time, they are mutually pledged the one to the other and to all not to resort to war. The conference opens with every prospect of success attending its deliberations, and particularly so in view of the fine understanding already reached between Great Britain and the United States. The hopes and desires of all mankind are wrapped up in its success.

If an accord can be reached in regard to questions of naval strength the next step, should, and undoubtedly will be, an endeavor to arrive at an agreement for the reduction of armies and other forms of land armament. Military preparedness, so called, as distinct from naval establishments, imposes an even heavier burden on most nations. Nevertheless, the question of the size of armies seems to present the more difficult problem.

For example, here in Canada we can understand why the United States with the Atlantic, and Pacific, and Gulf of Mexico bounding it on three sides, with its island possessions of the Philippines, Porto Rico, etc., and its ocean borne trade, should feel the necessity of a strong navy, but the majority of our people are at a loss to understand their need of a large standing army and an extensive National Guard or militia.

Following, as it did, the cordial reception tendered Premier Ramsay MacDonald by President Hoover, and the spontaneous acceptance of the invitation to the naval conference in London, Mr. Hoover's Armistice Day speech came as something of a shock in that he laid great stress, many people believe too much stress, on the old gospel of preparedness and particularly as it applied to the United States. Nor is this feeling allayed in President Hoover's first budget message to Congress, wherein he asks for increased appropriations for the army.

President Hoover's statement that sufficient forces must be maintained to prevent "the foot of the invader landing on our sacred soil," sounded like a sop to the militarists. There does not appear to be the vaguest possibility that any power or combination of powers contemplates any such fantastic step or that it is ever likely to happen. Canada and Mexico are the only two countries whose territory is contiguous to the United States, and this Dominion's permanent force of approximately 3,000 does not constitute a threat, nor has the U.S. anything to fear from Mexico. Why, then, such huge army expenditures?

President Hoover has taken a fine stand on naval reductions and also on the Kellogg anti-war pact, but if real progress is to be made towards world disarmament an even greater measure of enthusiasm must be displayed for reduction in land forces. In his address he referred to the fact that there are ten million men under arms in Europe, vastly more than in 1914. But, instead of attempting to formulate some plan whereby a reduction in these immense forces could be effected, Mr. Hoover seemed chiefly concerned in having the United States build up a bigger army to avoid invasion by these overseas millions.

Real friends of peace would have liked to hear President Hoover issue an urgent call to European countries to immediately start cutting down their armies, and, instead of advocating a still larger army for his country, he could safely have added weight to his plea by favoring a reduction, rather than an increase, in the United States land forces. The war-weary peoples in all countries would have welcomed such a lead from the United States.

Apparently the lesson that preparedness for war inevitably leads to war has not yet been sufficiently impressed upon the minds of the people. An enormous percentage of the four billions of dollars which Mr. Hoover asks Congress to provide in its next budget, is to cover the costs of former wars and to "prepare" for possible future ones. In 1928 the United States spent sixty cents out of every dollar on account of war financing. Another twenty cents went to the army and navy, making a total of eighty cents out of every dollar collected in federal taxes for military—and, in an economic sense, unproductive—purposes.

In that same year in Canada, a pacific nation, spending far less than other countries on war preparation and debts incurred by war, heavy as the latter are, 45½ cents out of every dollar expended by the Government was attributable to war.

In the light of these figures it is clearly evident that, if this damnable doctrine of "preparedness" is to be allowed to continue as the basis of international relations, all the efforts of the League of Nations, all Peace Pacts, all efforts of peace organizations will fail. The people must bestir themselves in order to avert the possibility of future wars.

Some people are hard to please. They are always looking for trouble and are not satisfied when they find it.

Looking To the Future

New York Shyscrapers To Have Mast For Dirigibles

Alfred E. Smith, skyscraper builder, has announced that the 1,100 foot tower of the Empire State building will be surmounted by a 200 foot mooring mast for Zeppelin airships through which passengers can descend in seven minutes to the street, instead of landing at Lakehurst, 70 miles away.

Mr. Smith will go to Washington to ask Secretary of the Navy Adams for the help of navy engineers experienced in mooring mast construction.

Already, Shreve, Lamb and Harmon, architects of the 85-storey building, have consulted the engineers of the Goodyear Zeppelin Company, which contemplates transportation lines with the two great airships it is building.

The directors of Empire State, Inc., of which former Governor Smith is president, have come to the conclusion, he said, that in a comparatively short time there would be a trans-Atlantic, trans-Pacific and transcontinental airship lines, and possibly a line to South America.

THOUSANDS OF MOTHERS USE NO OTHER MEDICINE

Baby's Own Tablets Are the Ideal Remedy For Babies and Young Children

Canadian mothers are noted for the care they give their little ones—the health of the baby is most jealously guarded and the mother is always on the lookout for a remedy which is efficient and at the same time absolutely safe. Thousands of mothers have found such a remedy in Baby's Own Tablets and many of them use nothing else for the ailments of their little ones. Among them is Mrs. Howard King, of Truro, N.S., who says:—"I can strongly recommend Baby's Own Tablets to mothers of young children as I know of nothing to equal them for little ones."

Baby's Own Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Fish Fry Transported To Stock Western Waters

Over Five Million Fish Fry Deposited In Western Waters During Past Year

There should be a lot of new good sport fishing in Western Canada waters in a few years. A report issued by the Canadian National Railways shows that during the current year that company transported 5,352,000 fish fry or eggs for deposit in various waters in Western Canada. Pickeral and the following varieties of trout were included in the shipments: Loch Leven, speckled, brown, salmon, rainbow and Kamloops. The pickeral were all placed in prairie waters and the trout in mountain and foothills waters.

Miller's Worm Powders will drive worms from the system without injury to the child. The powders are so easy to take that the most delicate stomach can assimilate them and welcome them as speedy easers of pain, because they promptly remove the worms that cause the pain, and thus the suffering of the child is relieved. With so sterling a remedy at hand no child should suffer an hour from worms.

Hotel Cecil Is Sold

Famous London Hostelry Purchased By Oil and Gasoline Corporation

The Hotel Cecil, one of the most famous landmarks between the Strand and the Thames for the last 30 years, and patronized especially by overseas visitors, has been sold to serve as headquarters for a great oil and gasoline corporation. The purchase price was about \$7,500,000.

The Hotel Cecil's disappearance is another proof of the tendency of all enterprises catering largely for visitors, both in amusement and accommodation, to move further westward in the city. The hotel possesses 900 bedrooms, and eleven banquetting halls, being the creation of a notorious financier, Jabez Balfour, who was brought back from refuge in the Argentine to suffer long imprisonment. The hotel was only partly built at the time of Balfour's crash. During the war it was the headquarters of the Royal Air Force.

A golf club has been invented which whistles when a drive is made correctly.

That Sore Throat Needs Minard's.

Complete Broadcasting Circuit

Canadian National Forges Last Link In Coast To Coast Radio Chain

By the completion of a broadcasting circuit from Edmonton to Vancouver, the Canadian National Railways have forged the last link in a coast-to-coast chain of radio stations. Announcement of the installation of the new circuit was made recently by the telegraph department of the system. The first broadcast to go over the new section took place on Thursday, December 19, when the Hart House String Quartet played before the microphone at Toronto. Up to the present, the Rockies have been a barrier against consistently good reception of eastern radio broadcasts, but now Pacific coast listeners will be able to hear the best concerts of the other centres of Canada. Contact between all parts of the Dominion may now be maintained by the medium of instantaneous transmission of speech. The vast radio network is an engineering feat which keeps pace with the progress of both Canada and the National system. The radio department will broadcast three hours weekly over the Atlantic-Pacific network and plans are underway for several commercial programmes to reach the coast.

Good Season For Furs

First Returns From Trappers In Northern Manitoba Are Favorable

A good fur season in northern Manitoba is indicated by first returns from the trappers. Dr. H. H. Elliott, commissioner for northern Manitoba, announces. During the past few years, the fur catch has been steadily decreasing, but this year a new cycle of successful trapping seems to have started.

The commissioner stated that the new regulations governing fur trade in the province seems to be proving satisfactory.

The number of trappers now working in the north has shown a substantial increase over the 1928 figure, Dr. Elliott asserted.

Many mothers have reason to bless Mother Graves' Worm Exterminator, because it has relieved the little ones of suffering and made them healthy.

Homes Of Steel

Steel houses, complete in every detail and including a bathroom, electric lights and central heating, are being planned for Paris. The houses can be constructed in eight minutes and can be erected on their sites in a few hours.

Minard's for the Ideal Rubdown.

Exports of ostrich feathers from South Africa in past years have amounted to \$15,000,000 annually.

ZAM-BUK

Beats Any Embrocation In Winter Aches & Pains

Try a Box To-Day!

Whilst Zam-Buk has long been recognised as Canada's most popular remedy in skin troubles, how many know how better it is than any poisonous liniment for relieving the sharp twinges of rheumatism, sciatica or lumbago?

Zam-Buk is equally good for aching backs, stiff joints, sore muscles, cold in the head and chest, or sore throat.

Rubbed well into the affected parts, Zam-Buk's powerful pain-soothing essences soak right into the tissues, banishing soreness, congestion and inflammation. Others prefer to treat their colds so; they rub Zam-Buk between the palms of both hands and then inhale the evaporating medicinal balsams. This does the same good in another way.

Also For COLD SORES 'CHAPS' CHILBLAINS &c.

Sale Of Farm Seeds

Disposal Of Pedigreed Seeds In Saskatoon Is Increasing Rapidly

A business that is expanding rapidly in Saskatoon is the sale of farm seeds. J. H. Speers estimates that the sales of pedigreed seed in the city has increased at least fourfold in the last five years. And there is still room for further expansion. "Five years ago," says Mr. Speers, "about 10 per cent. of the farmers knew what pedigreed seed was, and how it was procured. Now perhaps 50 per cent. have that information."

The Proven Asthma Remedy. Since asthma existed there has been no lack of much heralded remedies, but they have proved short lived and worthless. The ever-growing reputation of Dr. J. D. Kellogg's Asthma Remedy has given it a place in the field of medicine which no other can approach. It has never been pushed by sensational methods, but has simply gone on effecting relief and making new converts.

Cramped His Style

Old Mose Parker was pretty sick, and the darkey doctor promptly put him to bed and laid down all sorts of rules and regulations as to sleep and diet. After he had gone, Mose turned to his wife and complained:

"Mandy, how does dat dere fool doctor reckon Ah's gwine to eat breast ob chicken ebbery day if Ah ain't got ma ebginin's free?"

The population of the earth is said to double itself every 250 years.

Nearly 4,000 tons of lilies were used in China, this year, to make soup.

Foods Stay Fresh Longer This Way

Covered with Para-Sani Heavy Waxed Paper goods that usually stale in a day or so stay fresh for quite a long time. Try it. Get Para-Sani in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exacting uses get "Centre Pull" Packs in sheet form.

An Extensive Collection

Man Surprised At Number Of Edgar Wallace's Books

A man recently went into an English library and asked for the complete works of Edgar Wallace. "The result," he said, "was extraordinary. A whole squadron of men marched into the reading-room with long steel rods over their shoulders. Clamped to these rods were rows of Edgar Wallace's books, in wood. They reminded me of the long poles which vegetable-sellers carry, with onions slung on to them." He said that there must have been in all something like 200 books, including some very early Edgar Wallace poems, in the Masfield manner, now completely forgotten.

Possibility Of Developing Copper Mines In Far North Sketched By Major Burwash

The possibilities of developing copper mines in the far north, seem best along the shores of Bathurst Inlet, according to Major L. T. Burwash, who returned to Ottawa after having spent eighteen months on a trip through the sub-Arctic which took him some 4,000 miles by boat, behind a dog team and by air.

The veteran of the north, who has mushed behind dogs since 1897, brought with him news of the latest developments in the country which he has grown to know like a book. He thought that the mineral deposits on the Coppermine River, up which he travelled for some fifty miles, would be less valuable than those along the shores of the inlet for which the flying explorers of Col. C. D. H. McAlpine were making at the time they became lost.

Deposits along the Coppermine River, he explained, had been brought in by the ice drift and had been left high and dry, dotted all over the shores. During his trek up the river he picked up large chunks of metallic copper which had been left on caribou meadows when the ice receded. The action has now stopped, he said, and the field cannot be developed until someone finds the source from which the huge nuggets were torn by the ice.

On Bathurst Inlet, however, the copper is in place, he said, and probably exists in great quantities.

Major Burwash was a trifle non-committal on the question of whether or not the development of the copper mining industry in this part of the country might some day reach a stage here that would justify the engineering of a railway from Churchill, 900 miles west, to take care of it.

He thought, however, that should development ever reach large proportions, it would be cheaper to smelt ore on the ground, as coal is to be found all along the Arctic coast of Canada and occurs in heavy deposits at such points as Smoking Mountains and a part of Banks Island where it has been burning since the dawn of history in this region.

Water power is plentiful near the Arctic coastline, at least in a potential state. Most of the rivers flowing into the Arctic, the Major explained, travel slowly across the great plateau land of the interior and then, during the last fifteen or twenty miles of their courses, drop sometimes several hundred feet to a sea level in a series of rapids or cascades, some of which are splendid natural power sites.

Major Burwash, under orders of the Northwest Territories Branch of the Department of the Interior, started his trip on the well travelled route from Fort McMurray down the Mackenzie Valley to Aklavik on board the "Ptarmigan." From there he worked east where he took a dog team and travelled along the coast as far as Boothia Peninsula and the magnetic pole. After making some observations over the pole with the compass and dipping needle he came to the conclusion that the centre of magnetism is deep down in the earth. He explained that the horizontal needle was put out of action owing to the attraction downward through the earth, while the dipping needle, giving the inclination of the magnetic lines for force in the vertical plane was standing almost straight up and down.

From Boothia the Major worked his way back via King Williams Land and was finally picked up at Burnside River by Captain Guy H.

Blanchet, who had arrived on a search flight for the MacAlpine search operations and, during the long flight down, acted as navigator for the 'planes.

Fox Farming Centre

Between 1,500 and 2,000 Foxes Now In Saskatoon Area

According to "The Hub," between 1,500 and 2,000 foxes constitute the present stock in the Saskatoon region, which is recognized as the centre of the fox fur industry of the prairie provinces. At the big black fox show in Calgary, in 1928, the Saskatoon foxes captured the primary honors in competition with the best from Alberta, Saskatchewan and Manitoba. Saskatoon is the head office of the Canadian National Fox Breeders' Association (Saskatchewan section).

Winnipeg Newspaper Union

(By Annabelle Worthington)

A practical woven gingham in yellow and brown tones with bloomers that are cut generously full just peeping beneath, is smart choice for wee folks of 2, 4 and 6 years, sketched in Style No. 2743.

The chemisette with center scalloped closing, scalloped turn-over collar and narrow cuff bands are made of plain yellow gingham. White pearl buttons lend additional smartness.

In the four-year size, it can be copied exactly with 2 1/4 yards of 40-inch material with 3/4 yard of 27-inch contrasting. The saving is worth while.

All the fullness falls from shoulders with attractive flaring hemline. The bloomers have elastic inserted through casing at knees and waistline.

Brown cotton pique with beige pique is very fashionable choice for the little girl for school hours.

Nile green cotton broadcloth printed in novel rings in deeper shade of green with white pique contrast piped in the deep green shade in pique is very unusual combination. A candy stripe in percale with plain percale in predominating tone is cute.

For warmth you'll like wool jersey in pastel shade as beige, blue, orchid or green self-trimmed save for piping around edge of collar and front of chemisette of self-colour in deeper tone of grosgrain ribbon.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

WAS PREMIER'S MENTOR

Miss Jean Graham, who taught Dr. J. T. M. Anderson, premier of Saskatchewan, in Humberstone Collegiate Institute, Toronto, in 1898. Miss Graham, who presided over the history department of the school, then the Toronto Junction high school, says that the then future premier was an excellent student of history.

France Keeping Her Horses

Country Has Made Good the Loss Sustained In War

The automobile is not replacing the horse in France, an official survey reveals.

The total number of horses in France this year is estimated to be nearly the same as in 1913, when the automobile was not a serious menace to horsemanship.

The government survey shows that in 1913 there were approximately 3,200,000 horses in France. During the war millions of them were killed in action while many were eaten for food.

The years following the war looked dark and it seemed for some time that the fields of France would no longer see any horses. It was thought only the rich could afford a horse as a riding mount while the few left over would be sought by the museums.

But the farmers of France have staged a great comeback. They refused to introduce tractors and instead started breeding new herds of horses. As a result France is now well furnished with horsemanship. It is also stated the quality is much better, and that more horses are butchered at an earlier age because the public demands more tender meat. Horsemanship still remains a popular meat in France and special butcher shops proudly bear great metal horses heads over their doors.

That France intends to continue increasing the number of her horses is evident from last year's export and import figures. France imported 17,000 horses, and exported only 7,372.

See For Themselves

An Irish drill sergeant was putting a squad of recruits through the different movements. Try as he would he couldn't get a straight line. Finally, in exasperation, he shouted:

"What's the matter wid yez? Can't ye line up? All of yez fall out and take a look at the line you've made?"

The Carnegie Hero Fund, established 25 years ago, has awarded 19 gold medals, 526 silver medals, and 1,760 bronze medals since that time.

Advocates Uniform Text Books To Be Used In Schools Throughout The Dominion

Experiments With Fertilizers

Conference Held At Regina Reaches Decision To Continue Further Investigations

Experiments conducted during the past year into the use of fertilizer have been so successful, that the programme will be greatly extended during the coming season, with a view to determining at as early a date possible, the soil types and areas on which fertilizer may be most profitably used.

This decision was reached at a conference held at Regina, attended by representatives of the Consolidated Mining and Smelting Company, the Canadian Pacific Railway Company, the Massey-Harris Company, the Cockshutt Plow Company, the Dominion Government Experimental Farms Branch, the agricultural departments and universities of the province of Manitoba, Saskatchewan and Alberta, Dominion reclamation and irrigation branch, and the Manitoba Wheat Pool, through whose co-operation the experiments were held.

A similar conference was held a year ago at Trail, B.C., when experiments conducted during the summer of 1928 were discussed.

Experiments of the past summer show clearly that on the whole favorable results have been secured through the application of superphosphates and ammonium-phosphate. Although, due to the large number of experiments covering so wide an area, some did not show increased yields, it was pointed out that the experiments have been under way only for a period of two years and that this was insufficient time to warrant final conclusion.

Difficulty Encountered By Social Workers

Find It Hard To Protect Self-Respect Of Poor

An experienced social worker was once asked what she found to be the greatest difficulty in trying to carry help into homes of poverty. Without hesitation she replied: "Not to break down their self-respect." This is a delicate yet very practical consideration in such matters. Even the poorest and most unfortunate are entitled to their right of privacy. They may well be tempted at times to exclaim in the presence of what seems to them intrusion, no matter how well meant, that the heart knoweth its own bitterness and a stranger intermeddled not. Time and again it has been shown that the wisest and kindest and most successful philanthropy is that which takes pains to understand and safeguard the sensitiveness of those whom it is sought to aid.

For Student Aviators

A radio station is being built at Heston aerodrome which is to be used by flying instructors. Stationed there, the instructors will watch student aviators go through their capers above the building. Instructions will be broadcast from the station to the student flyers above. The pupils' planes will be equipped with receiving sets.

Latest in Locomotives

The new 2800 class locomotives now being placed in service by the Canadian Pacific Railway mark yet another forward step in the history of motive power.

These locomotives, ten of which are being built for fast passenger schedules, are of the Hudson type and in their speed, power, and efficiency, represent the result of years of experience in designing and construction on the part of the Company's engineers.

The new engines have a wheel arrangement not previously used in Canada, with four wheels in the leading truck, six 75 inch driving wheels

and four wheels in the trailing truck. The weight of the engine is 351,000 pounds and of the tender 293,000 pounds, while the overall length of the two is 91 feet 1 1/2 inches. Like the "fifty-nine hundreds," which were built for the freight and passenger service of the C.P.R. in the Rocky Mountains, they are equipped with the type "E" superheater; are stoker-fired, and have cylinders and underframes cast in one solid piece, weighing about 50,000 pounds. The nickel steel boiler is designed to withstand a working pressure of 275 pounds, and the engines' tractive effort will be in the neighborhood of 45,300 pounds.

Proposal that an interprovincial conference be held with a view to overcoming serious ignorance of their own country prevalent among Canadian school children, not to mention the adult population, was put forward by Dr. J. T. M. Anderson, premier of Saskatchewan, in his address before a luncheon meeting of the Canadian Club, at the Royal York Hotel.

Following his speech, Premier Anderson told an interviewer that he had in mind a meeting, possibly to be made yearly, of officials of provincial departments of education. As a beginning, they would concentrate on achieving uniformity of history and geography text books used in Canadian schools, and on impressing teachers under their supervision with the importance of knowing all about Canada and passing it on to their pupils.

"It might even become reasonable to agitate for a single history and single geography text book to be used all over Canada," he said.

"But the main point is that teachers and pupils and the public generally at present are appallingly uninformed and misinformed regarding the country they live in."

The need of circulating adequate and accurate information about Canada throughout the Dominion was stressed at the very opening of his address by Dr. Anderson, who left Toronto, in 1908, to engage in educational work, later becoming provincial director of education. He has taken an intense interest for some years in the regulation of immigration and the education of new Canadians to fit them to be good citizens.

"It is a pleasure," he remarked, "to drift back to the scenes of my youth and get an opportunity to convey some information about Saskatchewan without being thought boastful. As a school teacher, and one engaged in educational work, I have always felt that a great trouble in the Dominion is that we are not acquainted with each other."

"There are thousands in this province who know little or nothing about the West and not much more about even their neighboring province, Quebec. Worse than this, the average teacher in the secondary schools knows very little about this country, its size, resources, activities and peoples. I deeply hope that the various provinces will get together soon to discuss means of extending knowledge of our own country."

Dr. Anderson asserted that few Canadian children learned that the Dominion was larger than the United States, and 18 times bigger than Germany; that it constituted 28 per cent. of the area of the Empire and was the largest overseas Dominion, and was as large as the whole continent of Europe.

Although Saskatchewan has at least one, if not several, racial problems, the premier said it was far from becoming Communist or Soviet. Recalling his early days as a school teacher in the district, he contrasted the present conditions, pointing out the fact that the great majority of the former foreigners were now staunchly English.

Ottawa Winter Fair

The Ottawa Winter Fair, opened by Hon. W. R. Motherwell, Minister of Agriculture, on December 2nd, contained the largest display of livestock ever seen in the capital, while for the horse show more than 300 of the finest hunting, saddle and carriage horses in Eastern Canada were present.

"What have you done to yourself?" "Nothing—I am advertising a new strapping plaster."—Mocca, Vienna.

"How is it you ask me for a loan when I don't know you?" "It would be hopeless if you did."—Nagels Lustige Welt, Berlin.

**IMPORTANT QUESTIONS
OF SESSIONAL AGENDA**

Parliament has been summoned to assemble on Thursday, February 20th, for the fourth session of the sixteenth Parliament. The date, a week later than last year, is said to be due to the desire to have the three federal by-elections concluded and to conclude other conferences and arrangements before the House meets.

The volume of business in sight is large, and may be said to be contentious in many cases, especially in view of the fact that, this being the fourth session of the parliament, there is usage for dissolution and a general election although no indication of such has been given by the government. Even if it is certain that an election will not take place, however, political warfare is in the offing. The tariff will probably come in for chief attention, especially in view of the fact that the United States Congress is expected to dispose of its tariff revision. If the provisions of the new tariff affect Canada adversely, agitation for similar tariff action will no doubt find its way into the House. In addition the Canadian Tariff Board has been extremely busy for the past few months and will resume its sessions shortly, so that there is every indication that tariff changes will be foreshadowed in the budget.

Another proposal certain to evoke discussion is that of the United States for a large armed force along the border to enforce prohibition. Linked up with this question is the one previously discussed of prohibiting the export from Canada of liquor cargoes to the United States. Two main arguments, pro and con, are stressed. On one side is stressed the supposed moral obligation of Canada to help out its neighbor in making prohibition effective, and the fact that Canada is collecting millions in toll from a business which is in violation of the American statutes. The other side points out that the cost of aiding the United States to enforce its laws would be great; Canada would be losing a large amount of revenue if it prohibited the export of liquor, and other countries are not banning such exports to the United States.

As for the armed force along the border, such is looked upon as a potential hazard to the present harmonious international relations. Whether parliament will sanction the cooperation mooted, is doubtful.

The St. Lawrence waterway project will also come up this session, although there is nothing to show so far that the treatment will be legislative. An international angle in this connection is that the establishment of the new lake terminal at Prescott will necessitate the deepening of the channel. The channel is international and dredging by both the United States and Canada will be necessary.

The fourth international question will have reference to the Sockeye Salmon Treaty, which was held up last year.

In line with domestic legislation there will be the ratification of the agreements with the provinces of Manitoba and Alberta for the return of their natural resources, and it is possible also that Saskatchewan may

LOCAL & GENERAL

Mr. Robins, of the Royal Bank is relieving at the Bassano branch this week.

Miss Florence Reiber was a week end visitor at the home of her parents, Mr. and Mrs. H. M. Reiber.

Messrs. Wordie and Julien attended the Alberta Dairy Convention, held at Calgary, this week.

Mr. Cecil Adshead was a business visitor to the southern city the first of the week.

Mr. Frank Kauffman spent Wednesday in Calgary.

Mr. and Mrs. J. A. McGhee were visitors to the city of the foothills Wednesday.

Miss M. Farrell, of Edmonton, is visiting with her sister Mrs. Dr. Clarke this week.

According to the Alberta Gazette Messrs. J. Clarke and C. E. Reiber are appointed commissioners for oaths.

The Dench Cartage Co. has augmented its transfer equipment with three new White trucks of large capacity and power.

Mountain View Community Hall school fair board will hold their annual meeting on Saturday, Jan. 25 at 2 o'clock at the Hall. Everybody welcome.

Melvin Go-Getters are holding a short program, box social and dance at the Melvin School, Friday evening, Jan. 31st. Everybody come and help along with the Hall. Good music.

Didsbury is represented at Calgary Bonsel this week with two rinks: Johnson (skip), J. Hugel, Dooley, Kendrick, and Edwards, (skip), Kauffman, Sinclair, McNaughton, Eckel.

The McCloy rink which attended the Drumheller bonsel returned this year with a second and fourth prize. The rink consisted of McCloy (skip), Kaufman, Sanderman, Teskey.

Our readers know that every Wednesday is a half-holiday among the business houses of Didsbury. Non-subscribers make trips to town that afternoon, unaware that they cannot do business, thus causing themselves much disappointment and loss of time, which means cash, that would pay for a subscription for a number of years. To subscribers the Pioneer is a money saver as well as a money maker, and slowly but surely the public is realizing this fact.

be included, although negotiations cannot be said to be very complete with the latter government.

The Companies Act and Grain Act are two other measures due for consideration in the House; and in addition the report of the Royal Commission appointed to look into the question of salary revision for the technical and professional officials of the government service, is expected some time during the session.

A large number of private bills and divorce bills in addition indicate that the session will be a heavy one, especially in view of the profuse discussion which the questions enumerated are liable to evoke.

CANADIANS DRINK MILK

Statistics have shown that Canadians eat more butter and eggs per capita than the people of any other country. A recent survey made by the Canadian federal department of agriculture shows that one of the favorite beverages of the people of Canada is milk. To satisfy their demand for fresh milk alone takes 45,625,000 gallons a year, or about one pint per head of population per day. This increased use of milk has been brought about largely not only by a better appreciation of the value of this product in the diet, but also by the improvement that has been made in its production and general handling.

Dairying is one of the most important industries in Canada. The total annual value of dairy products is more than \$250,000,000.

Auction Sale

I have received instructions from Mr. J. N. DEVOLIN to sell by Public Auction at the old Gochee Farm, S.E. quarter 15-31-1 west 5.

Thursday, Jan. 30,

AT 1 30 P.M.

28 Head of Cattle.

5 yr old Holstein cow, to freshen Feb. 5; 6 yr old Holstein cow to freshen Feb. 7; 7 yr old Red Shorthorn cow, to freshen Feb. 4; 6 yr old Red Shorthorn cow, to freshen Feb. 10; 7 yr old Roan Shorthorn cow, to freshen Feb. 6; 3 yr old Holstein cow, 3 yr old Holstein cow, 3 yr old Holstein cow, 6 yr old Holstein cow, 5 yr old Holstein cow, 7 yr old Holstein cow, 6 yr old Holstein cow, 6 yr old Holstein cow; 3 one year old heifers, 3 one year old steers, 4 steer calves, 5 heifer calves.

Progress on the Princess Joan and Princess Elizabeth, Victoria-Vancouver night service boats of the Canadian Pacific Railway, has been so rapid that Captain C. D. Neroutsos, manager of the B. C. Coastal Steamship service, has announced that the trial trip of the first vessel to be ready will be March 25. Each ship has five decks and berthing capacity for 431 persons.

In the great Chinese province of Manchuria, equal in area to Germany, Marshal Liang Chang, 29-year-old war lord, is experimenting with education on a colossal scale to bring his war-ridden people to peace and progress, is the statement of John Nelson, former publisher of the Vancouver World, who recently landed from the Empress of Russia at Vancouver on his return from the Orient.

Great industrial development throughout western Canada which in the last two decades has brought the annual gross value of manufactured articles produced in the western provinces to \$600,000,000 was described recently by John F. Sweeting, industrial commissioner of the Canadian Pacific Railway, in an address to officers of the company at Winnipeg. "Those of us who have lived through and watched western Canada developments during the last 20 years are assured as to the future of that part of the Dominion," he said.

"Railway conditions as they exist in Canada to-day are readily comprehensible and we are in the fortunate position of being able to assure our shareholders that the decreases represent the result of an extraordinary combination of conditions and that the railways have not failed in efficiency or otherwise," stated E. W. Beatty, chairman and president of the Canadian Pacific Railway, in an address recently at the Royal York Hotel, at the annual meeting of the Commercial Travellers' Association of Canada. Mr. Beatty added that the situation in 1929 was exceptional and not likely to be repeated in subsequent years.

The North German Lloyd Company of Montreal is arranging for a trip of German farmers to Canada next summer with a view to investigating Canadian conditions and agricultural opportunities. The trip will commence with a visit to the Annapolis Valley, stopping at Kentville to view the Experimental Farm and the orchard country of Nova Scotia.

The Department of Lands and Forests reports that 1,076 moose and 1,335 deer were killed in Nova Scotia during the hunting season of 1929.

New Brunswick's potato crop for 1929 will have an official valuation of at least \$8,000,000 placed upon it according to intimations of the Provincial Department of Agriculture officials, when the final report on agricultural conditions for the season was issued recently.

RED CROSS

Donations of clothing, especially for little children, will be gratefully received by the undersigned.

W. A. AUSTIN,
Secretary Red Cross Society

NEW RED CROSS UNIT

Beautiful for situation is the new Junior Red Cross unit at the University Hospital, in Edmonton. As if by magic this fine new building has appeared, and where there were but grassy places a few months ago now you see a splendid building on which the sign of the Red Cross proclaims to all the world that the Society is still "carrying on" her great work of caring for the sick and crippled children.

The visitor is greatly impressed with the fine appearance of this new unit from the outside, where wide verandahs will offer to the little patients their best chance of cure in the bright and beautiful sunshine of Alberta "when summer comes." As soon as the good weather blesses the country, the little sick ones like the flowers of the field will blossom forth on the sunny side of these splendid sun-porches, absorbing the health-laden air that blows to them over wide woodlands and broad river.

The wards are large, airy and commodiously planned. Boys' ward, girls' ward, and cot ward and nursery. Easy indeed is it for the nurses to give the acme of attention to their cases when all has been so admirably planned with a view to nursing care and to the daily school which is carried on for those of school age. The large and modern furnished kitchen with its many devices for efficient housekeeping commends itself to the eye of every housewife. Service rooms and a quartz light room make treatments a simple matter.

The ventilating system of the hospital is also the last word and no matter what the temperature outside, there is always warm fresh air entering this wonderful little hospital. Bright tints on the walls with a note of color here and there in the stencilled figures, present an attractive appearance. New beds and cosy cots with tiny little first ward sizes for babies, are filled with happy Peters and Wendies all getting better in the New Red Cross unit.

NO HONKS ALOUD

The Royal Automobile Club of Oslo, Norway, maintains that no driver need use his horn within the boundaries of the city, that speed should always be so moderate that collisions can be avoided, and that cars turning corners at night give sufficient warning by their headlights. The club also proposes that the use of horns be made a punishable offence.

Finland is reported to have been experimenting with silent driving with satisfactory results, and the police of Madrid have made a ruling under which automobile horn tooters are being fined for making excessive noise. Fines are from \$2.50 to \$4.00 for each offence.

WHAT OTHER EDITORS ARE SAYING

SHORT-SIGHTED

The Gleichen Call on January 8th issued this statement: "The Call was not published last week owing to the fact that the business men of the town claim they could not afford to advertise. This may appear a strange statement in these modern days when the big majority of successful business men claim they cannot afford not to advertise at every opportunity."

This candid explanation from the publisher of the Gleichen paper emphasizes again the well-known fact that without advertising a newspaper cannot flourish, in fact the machinery stops running.

The local paper is a mirror of the community and business spirit of any town, and if the mirror does not present an attractive picture, so much the worse for the community. There must be coöperation.

The fact that the Gleichen paper was obliged to suspend publication even for one issue, reflects on the business enterprise of the town. It proves once more, that the business men cannot afford not to advertise.

—Vulcan Advocate.

Burnside Notes

In spite of bad weather and roads the free dance put on by the hall board in the Lone Pine hall on Friday evening was fairly well attended and a good time reported by all who were there.

Messrs Will and George Saunders were Calgary visitors last week.

Mr and Mrs. Peter Lowen had the misfortune to lose their youngest child, a three months old baby boy on Thursday last. The funeral was held on Sunday to the Menonite cemetery. We extend our sympathy to the bereaved parents.

Mr. Noah Eckel is spending the week in Calgary playing on Dave Edward's rink at the bonspiel.

Our recent storms have closed the roads for cars and people have to depend on horses for transportation.

Mr. Hugh McLean is spending the week in Calgary attending the U.F.A. convention a delegate from Burnside U.F.A.

WORLD HAPPENINGS BRIEFLY TOLD

Official France mourns Emile Loubet, former president who died recently at the age of 91.

Diplomatic relations between Great Britain and Russia formally resumed after a lapse of more than two and a half years.

The Canadian and United States delegation to the millennial celebration of the Icelandic parliament will sail from Montreal, June 15, aboard the S.S. Montcalm.

The Portuguese Government has authorized flour mills to import 100,000 tons of foreign wheat before June 1, 1930. The action was taken because of the small Portuguese crop.

A movement to erect a monument to the late Lloyd Bennett as a token of Germany's gratitude for his heroism in attempting to rescue the Bremen trans-Atlantic fliers has been started.

The B.C. provincial government is distributing to the municipalities \$550,414 as their share of liquor profits for the six months ending September 30, and \$206,978 from parimutuel taxes.

Canada has registered with the League of Nations her agreement with the United States regarding the admission of civil aircraft; her agreement with Sweden exempting shipping from income tax, and the agreement between Canada, Cuba, the United States and Newfoundland relative to fisheries.

Despite rebates of \$250,000 within six months to users of gasoline for industrial purposes, Alberta's gas tax has produced a net revenue of \$1,150,000 between April 1 and November 20, government officials state. At least \$50,000 more is expected to be taken in by March 31, 1930, the end of the fiscal year.

Canadian National Places Large Order

Will Do Much To Relieve Unemployment Situation In Dominion

Orders have been placed by the Canadian National Railways for 120,000 gross tons of steel required for the construction programme of the National System during the coming year, it was stated officially at Canadian National headquarters. Of this total, 80,000 gross tons have been ordered from the Dominion Iron and Steel Company, and 40,000 gross tons from the Algoma Steel Mills, at Sault Ste. Marie. In addition to steel orders, nearly 5,000 box cars have been ordered. Of the car orders placed, the Canadian Car and Foundry Company are to deliver 2,250 fifty-ton box cars, and 25 tank cars, each of 10,000 gallons capacity. The National Steel Car Company have received orders for 1,175 fifty-ton box cars, and the Astern Car Company have been given orders for 200 refrigerator and approximately 1,000 box cars. The placing of box car orders has resulted in the manufacturers placing orders with the British Columbia Mills for some 15,000,000 feet of box car material. The placing of these orders has had an important bearing on the employment situation throughout the centres concerned. Inquiries are also being made by the Canadian National among locomotive manufacturers for the delivery of 18 Santa Fe type locomotives and 15 mountain type engines.

IMPORTANT WESTERN CANADA INDUSTRIAL PLANT

One of the Western Canadian industrial plants, the refinery of Imperial Oil, Limited, at Regina, Saskatchewan, which supplies gasoline and oils for Western Canada consumption.

Recipes For This Week

(By Betty Barclay)

CINNAMON APPLES SUPREME

- 1 package vanilla junket.
- 1 pint milk.
- 6 apples.
- 1 cup sugar.
- 1/4 cup water.
- 3 tablespoons red cinnamon candies.

1 tablespoonful lemon juice. Peel and core apples and place in baking pan. Make a syrup by boiling the sugar, water and cinnamon candies together for 5 minutes; add lemon juice. Pour syrup over apples and bake until tender, basting several times. Place apples in individual dishes, adding a little syrup. When cooled and the syrup has jellied, prepare vanilla junket according to directions on package and fill dishes. Let stand in a warm room until firm.

POTATO STUFFING FOR ROAST GOOSE

- 2 cups hot mashed potatoes.
 - 1 teaspoon grated onion.
 - 1/2 cup chopped walnut meats.
 - Paprika.
 - 1 teaspoon salt.
 - 1/4 cup evaporated milk.
 - 1 tablespoon butter.
 - Yolks 2 eggs.
 - 1 teaspoon of poultry seasoning.
- Mix the ingredients in the order given and handle as any stuffing.

A Good Gardener

Saskatchewan School Teacher Wins Silver Cup For Improvement To School Grounds

Michael Evasch'sen is some gardener. For three years a silver cup has been awarded by the Canadian Horticultural Council, of Saskatchewan, for greatest improvement in school grounds during the year. Each time a school taught by Evasch'sen has won the cup which was donated for the purpose by Prairie Nurseries, Limited.

Announcement of this year's winner was made at Saskatoon by A. R. Brown, director of rural education for Saskatchewan. The cup goes to the Krasny school district No. 1121, 12 miles south of Shebo. Last year the cup was won by the Wishart school, north of Punnichy, and in 1927 by Janwo school, 16 miles northeast of Prince Albert. Evasch'sen was the teacher at all three schools, having spent a year in each place.

He is a native of Manitoba, attended school at Dauphin, and took third class normal work in Manitoba. He took his second class at Saskatoon, and spent a year at the Agricultural College.

His Worry

A business man returned from the city to find the maid looking scared. "I'm sorry, sir," she said, "but madam had an accident in the car this afternoon, and it's been completely smashed. 'Good lord,' said the aghast husband, 'and my clubs were in the dicky.'"

Killed By Chinese Bandits

Three Missionaries Are Slain In Most Revolting Manner

The Rev. James G. Kellet, superior of Maryknoll Junior seminary, at Los Altos, Calif., told the Associated Press that he had received by mail details of the murder, in China, recently, of three Franciscan missionaries, Bishop Jans and Fathers Bruno and Rupert.

Father Keller said the missionaries were killed in a most revolting manner, Bishop Jans being literally hacked to pieces. The clergymen were captured by bandits. The death of these missionaries, Father Keller said, brings the total number of Catholic priests killed in China recently, to 22.

To Prevent Seasickness

After 36 years at sea, during which time he served as surgeon on the "Aquitania," Dr. Sidney Jones has retired. He has published a preventative for seasickness based on a study of this illness during his life on the ocean. Take no alcohol a week before sailing, eat sparingly, and avoid all acid foods, is his advice.

The battle of Waterloo lasted only about eight hours.

Status Of Dominions

Conference Brings To Light Important Developments In Empire's Constitutional Position

Another important development in the Empire's constitutional position has resulted from the International Air Conference, just concluded at Paris. Britain and the Dominions, though they signed the 1919 international air convention separately, hitherto had one joint vote at the convention, despite sometimes conflicting interests. Now it has been unanimously agreed the Dominions have separate votes and the alteration is embodied in a protocol which the Dominions have signed in alphabetical order, along with other nations.

Cactus That Shoots

Dr. E. C. Leonard, Smithsonian Institution scientist, tells of a thorn-shooting cactus, of Haiti. The slightest jar to the bush will cause the cactus pads to shoot forth in a parabola several sharp thorns. These travel with considerable force, and can penetrate leather at a distance of six feet.

George Washington never lived in the White House. This edifice was not yet completed when he died.

Mid-Atlantic Airports

Artificial Islands Look Like Great Ironwork Piers

The idea of making a series of islands across the Atlantic as landing places for passenger-carrying aeroplanes that will one day ply the air between this continent and Europe has for long been the basis of romantic schemes. One such scheme is about to come true, and when it does, there will be eight floating islands between New York and Southampton, forming great stepping stones for the use of aircraft on regular scheduled flights.

These artificial islands are part of the equipment of a concern soon to exploit trans-Atlantic air service. The islands are known as Armstrong seadromes, after their inventor. Construction on them will begin this year. They will be anchored 400 miles apart, and will be landing ports for machines which expect to carry travellers from the United States to England or France in 15 hours.

Seen out of the water, the seadromes look like great ironwork piers. But they will float instead of stand. Thirty-two "legs" will support the seadromes, which will be 1,100 feet long, 400 feet wide and 350 feet high. The floating airports will be 80 feet above water, out of reach of the largest waves. The inventor says the peculiar construction will prevent all rolling or pitching. A hotel will stand on one side of each island, and a hangar and mechanics' quarters on the other.

The food of oysters consists chiefly of microscopic plants which are carried to them by the currents.

WINDOLITE

The Improved
Glass Substitute

MADE IN ENGLAND

COMES WITH A MESSAGE OF HEALTH

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 140 ozs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, is loved by Grace Farrel, the cigarette girl, but he doesn't know it. He marries Molly Winton, a ballad singer, and wins fame as a composer of popular songs. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend. She and Perry take the child Al adores, and sail for France. Al, broken by the loss, becomes a derelict. Months later he drifts into Blackie's place and is saved by Grace Farrel, who makes him promise to stage a comeback. Al falls in love with Grace, and while Grace is happy in his love, she often wonders what has become of Molly, and is worried.

CHAPTER XXVIII.

Grace realized that on many occasions when Al was silent he was thinking of his beloved son and wondering how Junior was faring. It was just about a year now since Molly had so cruelly taken him from Al and rushed off to Europe with John Perry. No word had reached New York concerning the elopers since that one message announcing that Molly was suing for divorce. This strange silence in itself was ominous to Grace. She knew that Al's life was inextricably bound up in Junior's and because of that Molly had a hold on him.

Perhaps Al sensed this feeling of instability in Grace. At any rate, he broached the subject near to her heart.

"Grace, you and I are going to be married one of these days?"

It was a question, not an assertion, and Grace looked at him with

gently interrogating eyes, saying nothing.

"Will you marry me, Gracie?"

"Al, you know how I feel. You know I love you—of course I want to marry you. But—"

"But what?"

"You don't even know if you're divorced or not."

"I'm finding that out—the lawyers are working on it now. I would have brought it up before, but I wanted to be well on the way to recovery before I mentioned it to you."

"But what about Junior?"

A faint shadow crossed Al's face, then he drove it away. He had reasoned that out, too.

"I can't have Junior, anyway," he said. "Molly would never give him up. And I do want you, Grace. I want you so much. I love you dearly, I never stop loving you for a single moment. I think you're the most adorable and fascinating and beautiful person on earth."

Grace stepped closer and looked up into his eyes. "And I feel the same about you, Al," she said simply and sincerely.

Meanwhile, what was happening to Molly in Paris?

During the first few months in the French capital and in the brilliant resorts along the Riviera she had been deliciously happy with John Perry. And she loved having Junior with her, too.

But Perry did not like Junior; the child was not his own and he often felt that the little boy came between him and Molly. Molly did not notice this at first, she only found increasing joy in the presence of the dark, handsome Perry. Never for a moment did she regret leaving Al and giving up the fame he had brought her on Broadway. She abandoned herself completely to her adoration of Perry, waiting impatiently for her divorce to be granted. This complete submersion of her character to the whims and demands of Perry astonished even Molly herself. Never had she believed it possible for her to forget herself so completely in thoughts of another person.

The couple travelled from one resort to another, spending money lavishly, but always circumspectly because the divorce had not yet been granted. When they gambled at Deauville or Monte Carlo it was Molly's money that was used, for it turned out that John Perry did not have so much after all. He had earned the reputation of having a fortune simply because of his lavish spending on Broadway.

But during this period the relationship between Molly and John changed perceptibly. It was John who began to show signs of boredom and Molly who became more infatuated. One day when she was moody he did not forgive her as Al had always done. He simply went away and stayed a few days. When he returned in response to her begging letters she loved him more madly than ever.

Then came the day when Perry said, "Molly, I wish you wouldn't have that child around so much. He interferes with our plans and he bothers me terribly."

Molly's voice trembled as she answered, "But I love him, John? What can I do with him?"

"Send him away," insisted Perry harshly. "Send him to a nursing home, or board him out with some family."

Molly gazed long into the handsome, irritated features of the man she loved. She realized she must do as he said if she would hold him. So little Junior was boarded out with a French family. It happened to be a family where he wasn't given good care, so his usually rosy cheeks became thin and pale. He was terribly lonely, too, and he often cried for his mother, his mother who only came to see him once a week now. Vaguely he remembered his daddy back in America, the daddy who had loved him so.

One day Molly realized that her money was dwindling with dangerous rapidity. John Perry asked almost daily for loans, which he wasted in gambling, and never suggested paying back. Molly was afraid to call him to account, afraid even to stop giving him money. With a deadly pain in her heart she sensed that she was on the verge of losing him. If she said a word he might up and leave her at a moment's notice, but if she kept silent he would probably marry her. And the divorce was due any day now.

Shrewd John Perry played pitilessly on Molly's infatuation for him, as pitilessly as she had once used Al's love became more uncertain with each

to further her ambitions. His temper passing day and his demands for large sums of money more insistent.

Then came the day when Molly received news of the divorce. She was wild with happiness as she flung her arms about John Perry's neck.

"Now, John, we can be married! Isn't it wonderful?"

Perry put his hands lightly on her shoulders and looked down into her eyes with a quizzical expression. A show-down was at hand.

"Wonderful?" he said deliberately.

"Well—maybe. And maybe not."

"What do you mean, John? Don't you want to marry me?"

"No; I don't think I do," he answered calmly.

Molly drew back. First her expression was beseeching, then came anger.

"After all I've done for you — to throw me down!"

Perry merely shrugged his shoulders in answer.

Then fury broke loose in Molly.

"You cheating dog!" She backed away from him, picked up a vase from a table, and sent it straight toward his head. Perry dodged deftly, smiling as the base smashed in fragments against the wall. With a nonchalant air he picked up his hat and stick.

"Where are you going?" cried Molly.

"I'm leaving. You'll never see me again."

Molly cried all that night. Next morning she received a telegram telling her Junior was dangerously ill!

Back in New York Al had returned to fame and Broadway in a Marcus revue. All over the city you could see the flaming billboards announcing his presence—"Al Stone—Broadway's Famous 'Singing Fool'" —as the headliner in the Marcus Revue for 1928. When you walked down Broadway at night you saw his name in yellow lights against the inky sky. His come-back was a complete success.

One night, as the stage doorkeeper at the Algonquin Theatre, where Al was appearing, sat smoking the stub of a cigar, a tidy and expensive little sport car drove into the alley by the stage entrance. Al was at the wheel and beside him sat Grace Farrel. The doorkeeper heard their happy chatter as Al parked the car. The young singer was feeling in particularly good form this evening, for the news had just reached him from Paris of Molly's divorce. That meant that he and Grace would soon be married.

(To Be Continued.)

Persian Balm—there is nothing like it for creating and preserving a lovely complexion. Cooling, caressing—it soothes and dispels all roughness or chafe caused by weather conditions. Delicately fragrant, it adds exquisite charm to the most finished appearance. Dainty women inevitably choose Persian Balm. A velvety smooth lotion, it makes the skin rose-leaf in texture. Recommended also to soften and whiten the hands. Truly a peerless toilet requisite for every woman.

Woman Has Busy Life

Works In Factory and Runs Farm At Eighty-Two

Another milestone in the busy life of Miss Kate Ralph, Cromwell, Conn., has been reached. Her eighty-second birthday was observed as usual, at her work in the plant of a toy manufacturing company, where she has been employed for sixty-five years. She paints toys. Daily she walks three miles to the factory and then peddles newspapers. Home again at night, she has a farm to look after before she calls it a day. A brother and sister live with her.

Whether the corn be of old or new growth, it must yield to Holloway's Corn Remover.

Lady (to doctor)—"I'm bothered with a little wart I'd like to get rid of."

Doctor—"You're in the wrong office, lady, the divorce lawyer is next door."

After Skating

Rub joints and muscles with Minard's to avoid stiffness or ache. Hockey players recommend it.

Needless Pain!

Some folks take pain for granted.

They let a cold "run its course."

They wait for their headaches to "wear off."

If suffering from neuralgia or from neuritis, they rely on feeling better in the morning.

Meantime, they suffer unnecessary pain. Unnecessary, because there is an antidote. Aspirin tablets always offer immediate relief from various aches and pains we once had to endure. If pain persists, consult your doctor as to its cause.

Save yourself a lot of pain and discomfort through the many proven uses of Aspirin. Aspirin is safe. Always the same. All drug-stores with complete directions.

TRADE MARK REG.

Man Has Shivered For Fourteen Years

Was Torpedoed In Arctic Circle and Has Not Been Warm Since

The coldest man in London is an omnibus conductor who claims that he has not been warm in 14 years. He told a reporter:

"I was torpedoed on August 8, 1915, in the Arctic Circle, and I've never stopped shivering since. I was serving in the auxiliary cruiser 'India,' and was four hours on a raft. I still dream of gasping for breath as the seas swept over us.

"Another man and I were interned in Norway, in a desolate spot, and we used to dress to go to bed."

The Medical Correspondent writes: "It is quite feasible that a mental shock should make a man cold for life. Warmth depends mainly on blood circulation, and pressure which are to a great extent controlled by the secretions of the ductless glands. Ideas or impressions can definitely affect their action."

It Will Relieve a Cold.—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Eclectric Oil will relieve the bronchial passages of inflammation speedily and thoroughly and will strengthen them against subsequent attack. And as it eases the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Oak Tree As Memorial

The million and a half French war dead have been commemorated by a single oak tree which has been planted on the place of the arch of triumph, near the tomb of the Unknown Soldier. This tree is the lieu of pilgrimage of thousands of persons daily. It is carefully tended, given plenty of water, and if it dies, it will be replaced, so that there will always, through time, be an oak tree on that spot commemorating the world war dead.

Minard's Wards Off Grippe.

Not Under His Own Power

Spectator—It was magnificent of you, sir, to dive from that height fully clothed, and effect such a difficult rescue in this mountainous sea.

The Rescuer—That's all very well, but what I want to know is who pushed me.

"Have you ever driven a car?" the lady applicant for a license was asked.

"One hundred and twenty thousand miles," put in her husband, who was standing near by, "and never had a hand on the wheel."

Little Helps For This Week

"Blessed is the man whom Thou chastenest, O Lord."—Psalm xciv. 12.

I know that trial works for ends Too high for sense to trace, That oft in dark attire He sends Some embassy of grace; May none depart till I have gained The blessing which it bears And learn, though late, I entertained An angel unawares.

—James Drummond Burns.

Be not afraid of those trials which God may see fit to send upon thee. It is with the wind and storm of tribulation that God separates the true wheat from the chaff. Remember, therefore, that God comes to thee in thy sorrow as really as in thy joys. He laments and He builds up. Thou wilt find thyself far from perfection if thou dost not find God in everything.—Miguel Molinos.

Falling Hair—Just try Minard's.

A Flood Of Testimonials

Perhaps the reason Commander Byrd is coming in for some criticism from other explorers is because of the flood of testimonials as to the merits of this and that used by his expedition. These testimonials presumably are well paid for by the recipients. Exploration becomes a little too commercial, perhaps, in such circumstances. But everybody's endorsing something or other nowadays.

Navigators estimate that winds blowing along the sea coast of the Alaskan Peninsula in summer sometimes have a velocity of 80 to 100 miles an hour.

NERVES WERE BAD

Could Not Sleep

Tired All Day Long

Miss Florence Coutier, Bark Lake, Ont., writes:—"I was troubled with my nerves, could not sleep at night, and felt tired all day long."

"A neighbor came in to see me, one morning, and advised me to take

"The first box did me good and after the sixth box I was able to go back to my work."

Price, 50c. a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Felt Tired and Miserable

"I took Lydia E. Pinkham's Vegetable Compound for miserable and tired feelings and it gave me strength to do my work. My nerves are better and I feel well and strong and have a good appetite. I sleep well and am in pretty good spirits and able to work every day now. I recommend the Vegetable Compound and you may use this letter as a testimonial."—Miss Delvena Wallace, Union Street, North Devon, New Brunswick.

Dairy Industry Has Great Future.

A great future is in store for the dairy industry of Canada, especially for this province, according to Hon. George Hoadley, minister of agriculture for Alberta, who addressed a joint meeting of all sections of the Alberta Dairyman's Association, in the Palliser hotel Tuesday night.

In dealing with the dairy situation in the province, Mr. Hoadley said that the government was endeavoring to stimulate the industry and in citing the tremendous grazing areas which helped to produce the fine breed of animals that have won many laurels in the east, intimated that the great potentialities of this province needed supervision. H. A. Craig, deputy minister of agriculture for Alberta, told his audience that he saw a big difference in the producers of dairy products at the present time, and lauded the vast educational features in connection with the industry.

Dean E. A. Howe of the University of Alberta, read a paper pertaining to the evolution of dairying which contained many humorous reminiscences of his boyhood days around the old cheese factory.

Alderman R. H. Weir, representing the city of Calgary, welcomed the delegates and also made a short address on cattle and their uses.

Here and There

(409)

Representatives of the English Folk Dance Society, thirteen in number, are sailing for Canada on S.S. Montrose, October 24, to take part in the English Music Festival arranged by the Canadian Pacific Railway at the Royal York Hotel, Toronto, November 13-18. The party is under the direction of Douglas Kennedy, leader of the English Folk Dance Society. The practice of English Folk Dances has spread to hundreds of thousands in the British Isles, and it is believed that the dancers' visit here will result in the popularization of these dances in Canada.

Approved plans calling for completion of construction within two years will enable the Canadian Pacific Railway to extend the Cutknife line through the Battlefords and eventually to the fertile farmlands of the vast Meadow Lake area, linking that part of Saskatchewan to the plains region lying towards Calgary and thence to a coast outlet at Vancouver. This construction will mean the turning of a new page in the history of one of the most promising agricultural sections of Western Canada.

"The mail must go through," slogan of the air mail service was well illustrated recently when S.S. Duchess of Bedford docked at Quebec with a heavy mail consignment which bad weather had prevented taking off at Father Point as is the usual practice. Mails were rushed four miles to the Quebec airport and reached Montreal one hour later. They were delivered by another special plane to the Toronto airport five hours after the Duchess had docked.

Two hundred and forty-eight mink and four foxes, valued in all at \$15,000, were carried recently by Canadian Pacific Express from Ontario and Manitoba and shipped by S.S. Montrose to France. They were all in good shape and represent one of the largest shipments of fur-bearing animals to European breeding farms of recent months. Demand comes from Great Britain, France, Germany, Holland and Switzerland.

For the second time in three years, the Investment Bankers' Association of America held their annual convention at the Chateau Frontenac, Quebec, this October. Over a thousand delegates attended from all parts of the United States and Canada and the convention was addressed by E. W. Beatty, chairman and president of the Canadian Pacific Railway.

Beaten out of world series glories, three members of the Yankees Baseball Team, R. Shawkey, coach; Roy Sherid, pitcher; and B. Bengough, catcher, saved their disappointment with a ten-day sojourn in the Laurentians, hunting section north of Montreal. Hunters coming out of this region just before, reported fine sport, and one of them brought a 52-inch moose head out of the wilds as a trophy.

Three years ago there were only four grain elevators in Alberta belonging to the Alberta Wheat Pool. Now there are 437, representing an investment of more than \$6,000,000. "The introduction of combines and auto trucks has speeded up harvesting on the Canadian prairies to a remarkable degree," says an official bulletin.

"Canary Korndyke Alcarta" a five-year-old Holstein Friesian cow, which a year ago claimed the world's championship as a butter-fat producer with 26,396 pounds of milk containing 1,080 pounds of butter-fat in 305 days, has beaten her own record. Following her 1927 record this famous cow was the guest of honour at a banquet in Moose Jaw. The latest record for "Canary Korndyke Alcarta" is 30,801 pounds of milk with 1,336.25 pounds of butter-fat.

To the amount of 55,181 pounds was produced in Nova Scotia in 1928, according to official figures, and the 1929 output will likely be much larger as the summer season of that year was much more favorable, says Philip Bishop, of Greenwich (Port William), the largest butter-maker in Nova Scotia.

Within from four to five years thousands of farmers throughout the province of Saskatchewan will have the benefit of all-weather roads running in all directions. The provincial government plans to spend \$5,000,000 annually during the next few years on the construction of six main highways, all-weather surfaced.

Notwithstanding the growing popularity of the motor car and motor power farm implements, the horse is evidently not going into the discard as rapidly as some people might be inclined to believe. Latest official estimate of number of farm horses in Canada as in June, 1929, is placed at 3,376,487. In 1919 the number was 3,667,369, a difference of only 290,882.

Running well ahead of schedule steel work on the 21-story addition to the Empire's largest hotel, the Royal York, additional construction is being rapidly pushed forward and the sixth story is now completed. All steel work is expected to be finished early in February and everything will be completed by June 1st, when there will be a total of 1,181 guest rooms at this palatial Toronto hostelry.

Hitting a 90-mile an hour clip, a special Canadian Pacific train recently carried two-and-a-half-year-old Delphis Morin, who was thought to be dying of intestinal influenza, from Sudbury to Toronto, for a blood transfusion in the Toronto Western Hospital. Leaving at 1:05 the train reached destination at 3:35, all traffic having been held aside for the special. At 8 the operation was performed and half an hour later the boy was smiling at his friends. He is now well on his way to recovery.

Fighting against Atlantic winter the cable ship John W. MacKay has just successfully completed another epic of the seas in effecting repairs to the high speed cable of the Commercial Cable Company over which much of Canadian Pacific cable business is carried to Europe. The cable was smashed in the great quake of November 18 the break being discovered within 36 hours of the arrival of the ship on the scene, raising the cable from a depth of 3 1/2 miles and at a point 80 miles from the western end of the break being part of the job to be done.
